PROFESSIONAL EXPERIENCE

Atos Maroc

Casablanca , Morocco | Hyprid
Oct 2023 - Present

Cloud/DevOps Engineer (full time)

- Migrated code repositories and user accounts from Bitbucket to GitLab, ensuring a smooth transition and maintaining version control integrity.

- Automated CI/CD pipelines using GitLab CI, enabling efficient build, test, and deployment processes.

- Built infrastructure on Azure using Terraform, creating consistent and repeatable infrastructure configurations.

- Automated infrastructure build process using Jenkins, improving efficiency and reducing manual effort.

- Deployed and configured monitoring tools (Grafana and Prometheus) on Kubernetes using Helm, enabling real-time application and infrastructure performance insights.

This experience honed my skills in DevOps methodologies, CI/CD automation, infrastructure as code (IaC), cloud platforms (Azure), containerization (Kubernetes), and monitoring tools. I effectively collaborated with cross-functional teams to achieve project goals and gained valuable experience in a dynamic DevOps environment.

Atos Maroc

Casablanca , Morocco | Hyprid
April 2023- Sep 2023

Cloud/DevOps Engineer (internship)

I have gained valuable experience through participation in a project centered around Anomaly Detection using Artificial Intelligence. In the course of this endeavor, Python served as our primary programming language for code development. Our dataset encompassed a variety of data types, including logs, traces, and metrics, which underwent a rigorous ETL (Extract, Transform, Load) process to ensure data integrity and quality.

As part of the project's technological stack, we effectively employed several cutting-edge tools and technologies. Notably, we leveraged Git and GitHub for version control and collaborative code management, utilizing repositories to store and share our source code efficiently. Moreover, we adopted Docker for containerization, enabling the encapsulation and streamlined deployment of our codebase and associated dependencies. These technologies played a pivotal role in optimizing our development workflow and project management.

SKILLS

- Linux Administration | Bash | Networking | Ansible | Terraform | Python | C++ | MySQL | Docker |Git
- GCP | AWS | AZURE | CI/CD | Github Actions | Gitlab CI | Jenkins | Kubernetes
- DevOps | Prometheus | Grafana
- Adaptability | Teamwork | Flexibility | problem-solving | work ethic | Communication

EDUCATION

Ibn Tofail university
Master's degree en Big Data & Cloud computing
2023

Ibn Tofail university
Bachelor of Mathematics and Computer Science
2021

LANGUAGES

- English: Full Proficiency
- Frensh: Full Proficiency
- Arabic: Native

CERTIFICATIONS

- **AWS SOLUTIONS ARCHITECT ASSOCIATE**
  MAR/2024 - MAR/2026

- **AWS CERTIFEID CLOUD PRACTITIONER**
  FEB/2024 - FEB/2026

- **SPECIALISATION DEVOPS ON AWS**

- **SPEEXX ENGLISH CEFR LEVEL C1.1**
  JUL/2023

- **AZURE ADMINISTRATOR ASSOCIATE 104 (ONGOING)**

- **17x** Badge and certificate on coursera platform(Python, Shell scripting...).
